

HAWORTH

The Alliance Program

www.ultrafabricsinc.com

Touch The Future

Ultrafabrics is a fusion of sustainable innovation, ultimate comfort, and contemporary style. For over 20 years we have combined our artisanal approach with state-of-the-art technology to create materials that not only provide superior performance, but also feel unlike anything you've touched before. Our selection within the Haworth Alliance program can be used across workspace, community, caregiver, and patient room* applications.

We proudly provide our customers with sophisticated fabrics that offer a high-performing alternative to animal-based products. Responsible manufacturing is part of our DNA, and we instill the principles of craftsmanship to produce the highest quality, healthiest products for a lifetime of use. This includes the development of next generation materials that limit the use of finite resources, improving the sustainability of existing resources, and advancing the use of renewable materials.

Designed to go beyond, our fabrics are inherently stain resistant. They can endure the demanding rigors of repeated cleanings and sanitization – no matter the environment. Unlike lesser-quality constructions, we utilize premium ingredients to ensure our products are able to withstand a range of bleach and alcohol-based cleaners and disinfectants.

*UF Select Montage not recommended for patient room applications.

Promessa[®]

Style meets stamina with Promessa, which features a pebbled texture and subtle sheen across a sizable range of neutral and deep tones. Bleach solution cleanable, industry-leading abrasion resistance, and a backcloth engineered with recycled polyester fibers makes Promessa ideal for high-traffic and sustainable specifications.

- No intentionally added PFAS
- SCS Indoor Advantage Gold certification
- Backcloth contains 8.3 recycled plastic bottles per yard

Composition:

100% Polycarbonate Polyurethane Surface
65% Recycled Polyester,
35% Rayon Backing

Weight & Thickness:

11.5 oz. per sq. yard /
390 grams per sq. metre
Approx. 1.1 mm

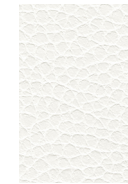

Abrasion:

ASTM D4157 400,000 DR (Wyzenbeek)

Hydrolysis:

16 Weeks
ASTM D3690 SECT. 6.11 (Hydrolytic Stability)
ISO 1419 Method C (Accelerated Ageing)
