

# Ultrafabrics 2024 Phaseouts

July 2024

Dear Customer,

Due to recently enacted and ongoing proposed American legislation banning the use of textiles containing intentionally added PFAS and the consideration by the EU to do the same, Ultrafabrics has made the decision to discontinue two collections that contain PFAS – Ultraleather Pro and Reef Pro. The last estimated receipts for Ultraleather Pro and Reef Pro into our US based warehouse will be September 1, 2024. The last shipment leaving our US based warehouse for both collections will be November 1, 2024.

As you may know, we recently launched Uf Select Concept Pro, a new ink and stain resistant collection, in collaboration with our mill partner in North America. This collection is PFAS-free and available for immediate shipment.

In addition to the above, Ultrafabrics will be phasing out the Fusion, Fusion Shimmer, and Fresco collections, in addition to one SKU of our Pearlized collection, on December 31, 2024.

Please be aware that for each of the phased-out collections mentioned, meterage will be available on a first come, first served basis. We have provided an Ultraleather Pro and Reef Pro alternate where one exists, based on available inventory and until inventory is depleted.

In most cases, we can offer a similar colour and/or grain as an alternative option, as detailed in the below list. Please note that not all alternates are recommended for all applications. Please contact your sales representative or customer service with any questions you have.

We appreciate your business and continued partnership.

Item #	Collection	Colour	Alternate Suggestion (similar in colour or grain)
554-0008	Ultraleather Pro	White Wash	777-00153 Concept Pro – Frostline 291-0001 Ultraleather – White 393-5750 Brisa Forecast – Polar
